Learn to spot Vaccine Misinformation

Misinformation is incorrect or misleading information. It can be hard to spot the difference between trustworthy information and misinformation, particularly about important topics like childhood vaccines.

6 Questions to Ask

- 1 Where did the information come from?
- 2 Do the claims seem reasonable?
- 3 Is the information up-to-date?
- 4 Is this a trustworthy source of information?
- 5 Is the information based on scientific research?
- 6 Does the information seem to present an unbiased point of view?

What You Should Know
